TO: SINGAPORE TELECOMMUNICATIONS LIMITED.

FAX NO: 0019-65-6738-3769

FROM: ASX LIMITED - Company Announcements Office

SUBJECT: CONFIRMATION OF RECEIPT AND RELEASE OF ANNOUNCEMENT

MESSAGE:

We confirm the receipt and release to the market of an announcement regarding:

Change in substantial holding

If ASX considers an announcement to be sensitive, trading will be halted for 10 minutes.

If your announcement is classified by ASX as sensitive, your company's securities will be placed into "pre-open" status on ASX's trading system. This means that trading in your company's securities is temporarily stopped, to allow the market time to assess the contents of your announcement. "Pre-open" is approx. 10 minutes for most announcements but can be 50 minutes (approx) for takeover announcements.

Once "pre-open" period is completed, full trading of the company's securities recommences.

PLEASE NOTE:

In accordance with Guidance Note 14 of ASX Listing Rules, it is mandatory to elodge announcements using ASX Online. Fax is available for emergency purposes and costs A\$38.50 (incl. GST). The only fax number to use is 1900 999 279.

SingTel International

SingTel Investor Day 2007
21 June 2007 - Singapore

Mr Lim Chuan Poh,
CEO, International

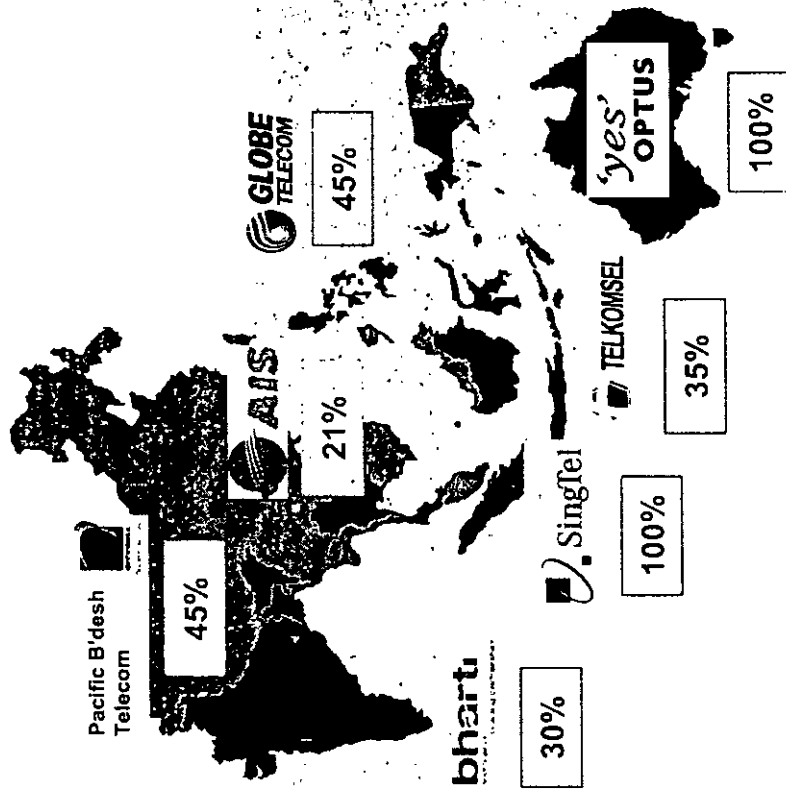

An increasingly bigger part of the Group

Aggregate base at Mar 07¹

124m

Regional mobile
FY07 proportionate EBITDA

38%

Others

Australia

1%

31%

38%

Regional
Mobile

30%

Singapore

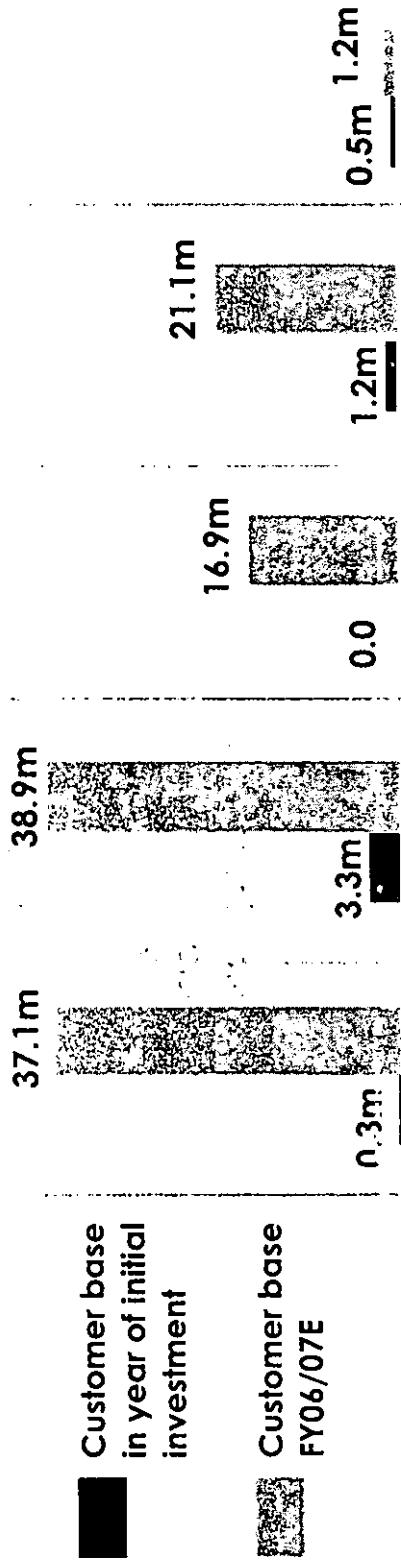

1. Mobile sub numbers as at Mar 07

Snapshot of our Regional Investments

➤ investments continue to grow/maintain their market position

Effective stake (%)	30.5%	35.0%	44.5%	21.4%	45.0%
Market position ¹	#1	#1	#2	#1	#4
Market share (%) ¹	23%	55%	38%	49%	5%
Penetration ²	15%	30%	51%	68%	16%
Year of initial investment	2000	2001	1993	1999	2005

Figures as at 31 March 2007

Key challenges

1. Identifying potential markets

- focus on Asia
- form strategic fit

2. Preparing for the future

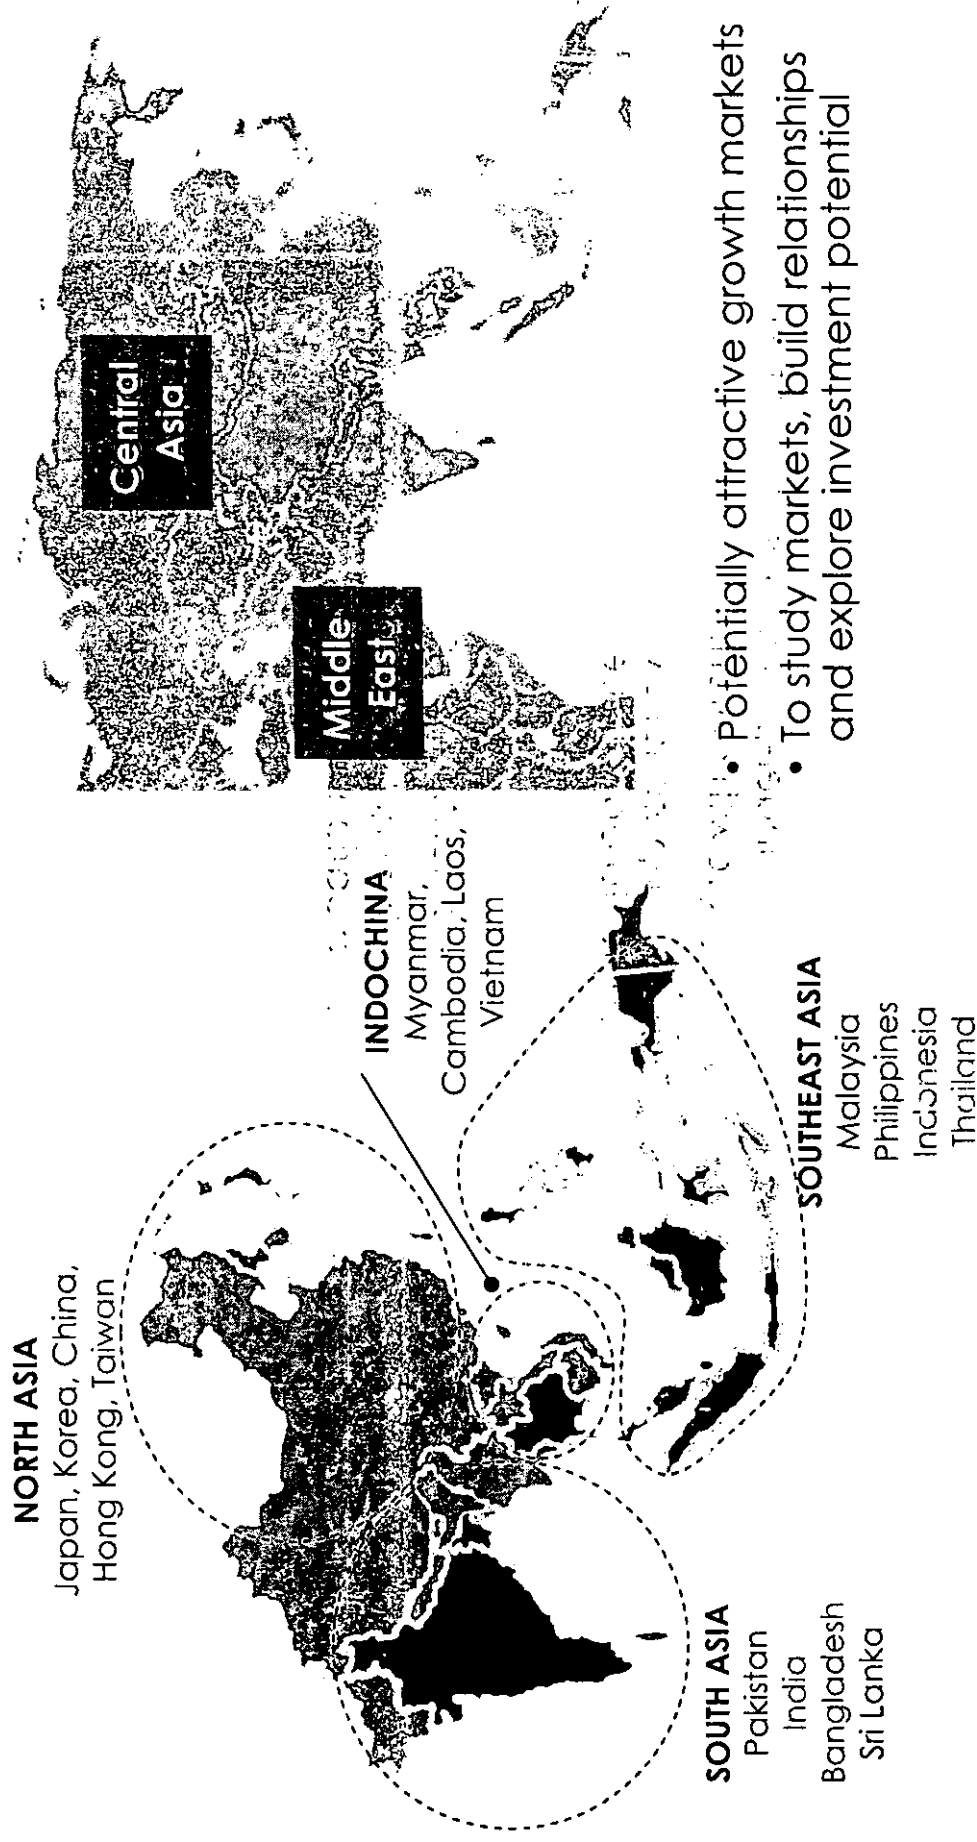

- creating regional synergies
- evaluating new opportunities

3. Managing key risks

4. Continuing the momentum

Identifying potential investments

➤ focus remains in Asia while exploring new markets

- Potentially attractive growth markets
- To study markets, build relationships and explore investment potential

NB. Countries in red represent existing Investments.

Identifying potential investments

➤ strategic fit

Market structure

- Sizeable under-penetrated market with strong growth potential; OR
- Mature operations with significant scope for SingTel to add value

Strategic participation

- Involvement/influence in business
- Growth enhancement and synergies from participation in SingTel Group

Strong partnership

- Common goal to grow the business
- Leverage local partners' knowledge of markets
- SingTel's participation strengthens governance/internal controls

Preparing for the future

➤ creating regional synergies

1

Technological systems

Technical Support

- Explore regional systems for management of inventory and network
- Business continuity planning – regional system redundancy
- Develop shared regional networks for emerging technologies (e.g. WiMAX)

2

Sales/marketing scale/interoperability/cross-learning

Regional Business

- Analysis of sales/marketing programmes for cross learning/implementation
- Going beyond central procurement of SIMs and into handsets/content customization for Bridge and Associates

3

Providing leadership

Regional Mobile activities

- Develop framework for centralized sharing of best practices
- Build relationships and trust amongst investments through value-adding regional activities – eg forums, touching life fund

4

Talent management

Regional HR

- Identification and development planning of skills / attributes required for region
- Resource management – succession planning
- Performance measurement & management

Preparing for the future

➤ evaluating new opportunities

Increase value potential by identifying strategic fit and synergies

1

In-country

Explore upstream & downstream opportunities adjacent to Telco industry

In-country growth through regional initiatives

2

Adjacent countries

Tap synergies in neighboring countries and markets with strong cultural fit – seen as extension to home market
eg Cambodia & Vietnam

3

3rd countries

Leverage strong links with 3rd countries to consider joint investments with associates
eg Filipino captive market in Middle East

Share Risk

+

Strengthen Strategic ties

+

Increased Resource Pool

Managing key risks

Key risks

Strategy

- Price competition from new entrants and fixed wireless
- High cost structure due to backhaul/power costs

- Mitigate price erosion with market segmentation
- Manage pace of rural rollout

- Overseas expansion by Bharti

- Leverage SingTel's M&A experience; co-investments with SingTel
- Leverage India's trade links and historical ties

- Continuing price war
- Regulatory uncertainty over changes to concession agreement
- Political developments in Thailand

- More leverage on SingTel regional mobile capabilities and/or Bridge alliance
- Collaborate with Government to ensure equal & fair treatment for all operators

Managing Key Risks

Strategic Objectives

Key risks

Strategy

- Ability to transcend the fast maturing mobile market into the wireless/mobile data space

- Extending wireless competencies into fixed broadband space with DSL rollout and adopting future technologies such as Wimax

- Challenges of CDMA in a GSM market

- Strengthen focus on acquisition
- Achieve critical mass for handset breakeven cost for customers

Continuing the momentum

Subscriber growth momentum

Contribution to the Group

Asia's Leading
Communications Company

Forward looking statements - important note

The following presentation may contain forward looking statements by the management of SingTel Optus relating to financial trends for future periods, compared to the results for previous periods.

Some of the statements contained in this presentation that are not historical facts are statements of future expectations with respect to the financial conditions, results of operations and businesses, and related plans and objectives. Forward looking information is based on management's current views and assumptions including, but not limited to, prevailing economic and market conditions. These statements involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those in the statements as originally made. Such statements are not, and should not be construed as a representation as to future performance of SingTel. In particular, such targets should not be regarded as a forecast or projection of future performance of SingTel. It should be noted that the actual performance of SingTel may vary significantly from such targets.

"S\$" means Singapore dollars and "A\$" means Australian dollars unless otherwise indicated.

Highlights of FY07

Delivering
on our
promises

- Met FY07 guidance
- EBITDA returning to growth
- Outperformed many in the industry

Strong
underlying
business

- Maintained mobile market share with the best margins in the industry
- Continued leadership in prepaid mobile
- Accelerating ULL sales and migrations
- Continuing to gain Corporate share

Delivering
transformation

- First phase of IT system transformation complete
- Continued customer care offshoring to India and the Philippines
- Core IP network delivered, new IP products well advanced

Looking to
the future

- Launched the first D-series satellite with two more in the pipeline
- Announced extensive regional 3G mobile rollout
- Leading the G9 to ensure fair competition in broadband

Ms Vicki Brady
VP (Consumer Marketing)

Forward looking statements - important note

The following presentation contains forward looking statements by the management of Singapore Telecommunications Limited ("SingTel"), relating to financial trends for future periods, compared to the results for previous periods.

Some of the statements contained in this presentation that are not historical facts are statements of future expectations with respect to the financial conditions, results of operations and businesses, and related plans and objectives. Forward looking information is based on management's current views and assumptions including, but not limited to, prevailing economic and market conditions. These statements involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those in the statements as originally made. Such statements are not, and should not be construed as a representation as to future performance of SingTel. In particular, such targets should not be regarded as a forecast or projection of future performance of SingTel. It should be noted that the actual performance of SingTel may vary significantly from such targets.

"S\$" means Singapore dollars and "A\$" means Australian dollars unless otherwise indicated. Any discrepancies between individual amounts and totals are due to rounding.

MESSAGE:

We confirm the receipt and release to the market of an announcement regarding:

6/21/07

Investor Day 2007-Presentation by Koh Kah Sek & Vicki Brady

If ASX considers an announcement to be sensitive, trading will be halted for 10 minutes.

If your announcement is classified by ASX as sensitive, your company's securities will be placed into "pre-open" status on ASX's trading system. This means that trading in your company's securities is temporarily stopped, to allow the market time to assess the contents of your announcement. "Pre-open" is approx. 10 minutes for most announcements but can be 50 minutes (approx) for takeover announcements.

Once "pre-open" period is completed, full trading of the company's securities recommences.

PLEASE NOTE:

In accordance with Guidance Note 14 of ASX Listing Rules, it is mandatory to elodge announcements using ASX Online. Fax is available for emergency purposes and costs A\$38.50 (incl. GST). The only fax number to use is 1900 999 279.

SINGAPORE TELECOMMUNICATIONS LIMITED
(Incorporated in the Republic of Singapore)
Company Registration Number: 199201624D

ANNOUNCEMENT ON
NOTICE OF BOOKS CLOSURE/RECORD DATE

NOTICE OF BOOKS CLOSURE

(for Shares Quoted on the Singapore Exchange Securities Trading Limited)

NOTICE IS HEREBY GIVEN THAT the Transfer Book and Register of Members of the Company will be closed on 13 August 2007 for the preparation of dividend warrants. Duly completed registrable transfers of the ordinary shares in the capital of the Company ("Shares") received by the Company's Share Registrar, M & C Services Private Limited at 138 Robinson Road, #17-00 The Corporate Office, Singapore 068906, up to 5.00 p.m. on 10 August 2007 will be registered to determine members' entitlements to the proposed final and special dividends.

Members whose Securities Accounts with The Central Depository (Pte) Limited are credited with Shares at 5.00 p.m. on 10 August 2007 will be entitled to the proposed final and special dividends. Payment of the final and special dividends, if approved by members at the 15th Annual General Meeting, will be made on 30 August 2007.

NOTICE OF RECORD DATE

(for Shares Quoted on ASX Limited issued in the form of CHESS Units of Foreign Securities)

NOTICE IS ALSO HEREBY GIVEN THAT the record date ("Record Date") to determine entitlements to the proposed final and special dividends is 10 August 2007. Holders of CHESS Units of Foreign Securities relating to ordinary shares ("Shares") in the Company ("CUFS") as at the Record Date will be entitled to receive the proposed final and special dividends. Payment of the final and special dividends, if approved by members at the 15th Annual General Meeting, will be made on 30 August 2007.

The rate of exchange applicable in determining the amount of currency of Australia that is to be paid to satisfy the obligation to pay such proposed final and special dividends in relation to the Shares which are listed on ASX Limited, including Shares traded in the form of CUFS, will be the average of the quoted rates, as selected by any Director, prevailing over the five market days immediately preceding the Record Date.

By Order of the Board

Chan Su Shan (Ms)

Company Secretary

Dated : 18 June 2007

Notes:

A member (other than CHESS Depository Nominees Pty Ltd) who wishes to have his SingTel Dividends credited directly into his bank account should contact The Central Depository (Pte) Limited at Tel: +65 6535 7511, if he has not already signed/returned his Direct Crediting Authorisation Form.

A CUFS holder who wishes to have his SingTel dividends credited directly into his bank account should contact the Company's Australian registry, Computershare Investor Services Pty Limited at Tel: 1800 501 501 or +61 3 9615 5970, if he has not already signed/returned his Request for Direct Crediting of Dividends Form ("Form"). The Form can be downloaded from www.computershare.com.

For the avoidance of doubt, the above information is provided for the members of the Company who are entitled to receive dividends. The Company does not intend to pay dividends in cash to members who are not entitled to receive dividends. The Company's policy is to pay dividends in cash to members who are entitled to receive dividends.

Announcement Title * Bridge Mobile Alliance welcomes Advanced Info Service as its 11th operator member

Description

Attachments:

 BridgeAIS18Jun07.pdfTotal size = **183K**
(2048K size limit recommended)[Close Window](#)

EMBARGOED FOR RELEASE UNTIL 1200HRS, 18 JUNE 2007

Bridge Mobile Alliance welcomes Advanced Info Service as its 11th operator member

The alliance's combined subscriber base exceeds 160 million across 11 territories in Asia Pacific

(18 June 2007) Bridge Mobile Alliance, the leading mobile alliance in Asia Pacific welcomes the joining of Thailand's Advanced Info Service ("AIS") as its newest operator member today.

With the addition of AIS, the alliance now has 11 operator members with a combined subscriber base of more than 160 million across 11 territories, and it is the largest mobile alliance in Asia-Pacific.

Earlier in February 2007, SK Telecom had joined the alliance; now both AIS and SK Telecom are also investing in the joint venture company Bridge Mobile Pte Ltd ("Bridge Mobile") as shareholders of the company. Bridge Mobile is the commercial vehicle in which the founding operators have jointly invested when the alliance was launched in November 2004; to establish a shared infrastructure and common service platforms to deliver regional mobile services across geographical borders, and to provide a better user experience for customers roaming on the alliance members' networks.

Mr Vikrom Sriprataks, Chief Technology Officer, AIS, said, "We are pleased to join Bridge Mobile Alliance who has the widest coverage of top-tier operators in the region. We look forward to working with the member operators to provide more value added services and a seamless roaming experience for our customers. AIS is the market leader in Thailand and being part of the largest regional mobile alliance group will further enhance our position as the leading and preferred operator for our customers."

Mr Shin Bae Kim, President and CEO, SK Telecom, said, "We see Bridge Mobile Alliance as a unique establishment for leading operators to cooperate with each other and provide benefits to the end users. SK Telecom is pleased to share our

knowledge and best practices with the alliance partners and we hope to create more innovative services that will benefit our customers."

Ms Mary Ong, Chief Executive Officer, Bridge Mobile, said, "This is indeed another significant milestone for us and we sincerely welcome SK Telecom and AIS to Bridge Mobile Alliance. We are privileged to be an alliance of the best-of-breeds in the mobile industry and we seek to leverage on the collective strengths of our partners to deliver clear benefits to our stakeholders and customers. The alliance was formed with clear objectives to create value and benefits for our member operators, end users and our technology partners. With a combined customer base of more than 160 million subscribers across 11 territories, we have the critical mass to continually develop new ideas and cooperation opportunities that will bring about synergies and commercial benefits. We look forward to working closely with all our partners to deliver these benefits."

About Bridge Mobile Alliance

Established in November 2004, Bridge Mobile Alliance is Asia Pacific's leading mobile alliance group. The alliance is a current partnership of eleven leading mobile operators in Asia Pacific, namely, Airtel (India), Advanced Info Service (Thailand), CSL (Hong Kong), CTM (Macau), Globe Telecom (Philippines), Maxis (Malaysia), SingTel Mobile (Singapore), SingTel Optus (Australia), SK Telecom (Korea), Taiwan Mobile (Taiwan) and Telkomsel (Indonesia), as well as eight technology associate members. Bridge Mobile Alliance operates through a Singapore-incorporated joint venture company, Bridge Mobile Pte Ltd.

Bridge Mobile Alliance offers significant commercial benefits and economies of scale to alliance members. Through close collaboration, alliance members can leverage on collective capabilities and best practices to develop innovative mobile services for the Asia Pacific markets.

Bridge Mobile Alliance will invest up to US\$40 million to build and establish a shared regional infrastructure, and to deliver a wider suite of regional mobile services. More importantly, Bridge Mobile Alliance is focused on creating a consistent delivery of regional mobile services across the region, thereby offering customers a seamless experience beyond borders. For more information, visit www.bridgemobile.com

About Advanced Info Service

Advanced Info Service Public Company Limited or AIS is an affiliation of Shin Corporation, under the business segment of Wireless Communications.

AIS was established in 1989 as the first mobile phone service operator in the 900 MHz frequency range utilizing Digital GSM systems, and is today the largest mobile operator serving more than 20 million subscriber nationwide. AIS has expanded continuously through its subsidiaries into a broader range of wireless communications services including import and distribution of SIM card and handsets, data communication service, broadband TV, mobile payment, call center and international telephony service.

AIS' mission is to deliver superior services that can be part of people daily life. It is aimed to maintain its dominance in market share of revenue and net profit growth, to enhance value for its stakeholders and to dedicate continuously to Corporate Social Responsibility. For more information, visit www.ais.co.th

About SK Telecom

SK Telecom has made a number of historical breakthroughs in the Korean telecommunications industry since its establishment on March 29, 1984. Its history has evolved from a first generation analogue cellular system, to the world's first second generation CDMA, then to the world's first third generation synchronized IMT-2000 cellular system. SK Telecom was also the first in the world to commercialize HSDPA in May 2006 and open the way for the age of video calling. Based on these advanced mobile communications technologies, SK Telecom has become a pioneer in paving the way for a next generation network arena that includes the development of 4th and 5th generation mobile communication technology.

Based upon rapid network advancement, SK Telecom has mapped out a variety of

future growth engines that continue to create new values for its customers, bringing customers a more convenient Ubiquitous Life and providing innovative and customized services that are superior to anything they have ever experienced. These services include 'NATE', a wired and wireless integrated multi-Internet service, 'June', a premium multimedia service, 'MONETA', a state-of-the-art financial service, Digital Home service and Telematics. In 2004, SK Telecom successfully launched "Hanbyul," the world's first DMB satellite, to presage the age of "TV in my palm" and lead the world in the infusion of telecommunications and broadcasting.  (2048K size limit recommended)

Close Window

SINGAPORE TELECOMMUNICATIONS LIMITED

(Incorporated in the Republic of Singapore)

Company Registration Number: 199201624D

Optus 50% joint venture obtains Government funding for rural and regional Australia broadband network

On 19 December 2006, SingTel announced that OPEL Networks Pty Limited (OPEL), a 50% owned joint venture of Optus Networks Pty Limited (Optus – a wholly owned subsidiary of SingTel) with Elders Telecommunications Infrastructure Pty Ltd (Elders – a wholly owned subsidiary of Futuris Corporation), had lodged an application for funds under the Australian Government's Broadband Connect Infrastructure Program (BCIP).

SingTel is pleased to announce that OPEL has secured in-principle approval of A\$958 million in funding for a rural and regional wholesale broadband network in Australia.

With this approval, OPEL will commence negotiations with the Australian Government to finalise the commercial agreement. The Government requires the network to be built by 30 June 2009.

Optus and Elders will contribute A\$917 million towards the project through up to A\$200 million cash financing, existing extensive infrastructure and distribution presence of its shareholders and in kind contributions.

Optus will adopt equity accounting for its 50% stake in OPEL. The equity accounted results of OPEL and other commercial arrangements that Optus will have with OPEL are not expected to have a material impact on the financial statements of the SingTel Group for the year ending 31 March 2008.

Media Release

18 June 2007

Elders and Optus to build rural and regional broadband network

The Optus and Elders joint venture, *OPEL Networks Pty Ltd* (OPEL), has secured \$958 million in funding from the Australian Government.

This comprises \$600 million from the previously announced Broadband Connect Infrastructure Program and an additional \$358 million in funding to further extend high-speed affordable broadband services to rural and regional Australians.

The OPEL network will cover 638,000 square kilometres extending across all States and Territories.

OPEL will deploy 1361 broadband wireless sites and install ADSL2+ in 312 exchanges.

Optus will also activate 114 new exchanges with ADSL2+ as part of its existing commitment to provide competitive broadband services. The total number of new exchanges to be activated with ADSL2+ by OPEL and Optus will be 426.

OPEL will initially deliver wireless broadband speeds of up to 6 megabits per second (Mbps) rising to 12 Mbps by 2009 using an internationally deployed broadband wireless technology appropriately designed for Australian conditions. Broadband delivered by ADSL2+ will have speeds of up to 20 Mbps.

Through OPEL, Optus and Elders will contribute \$917 million towards the project through upgraded infrastructure, cash and in kind contributions.

Paul O'Sullivan, Chief Executive, Optus said: "This is a major win for competition and choice in rural and regional Australia.

"This is a common sense partnership that builds on Optus' and Elders' mutual strengths. We will create a competitive wholesale market that will transform rural and regional telecommunications. OPEL will drive big benefits for rural and regional customers by providing competitive broadband services.

Media Release

"The Australian Government's rigorous, detailed and well contested competitive tender process has gone a long way to build a regional wholesale network to deliver competition and a sustainable solution to rural and regional Australia's future broadband needs."

Les Wozniczka, Chief Executive Officer, of Elders parent company Futuris said: "We are delighted that OPEL has been selected to deliver what will be a landmark infrastructure project for Australia."

"The program will deliver much needed access, equity and social benefits to rural and regional communities. The OPEL network is the result of 18 months highly detailed work to address those needs."

The OPEL network will provide significant competitive backhaul capacity. This will break the current monopoly and offer a competitive supply of backhaul to other local internet service providers as well as Elders and Optus. OPEL will use almost 15,000 kilometres of backhaul through existing Optus transmission, leased transmission and the construction of new transmission fibre.

Where feasible the joint venture will make the best use of existing Optus infrastructure by co-locating broadband wireless equipment with existing 2G / 3G mobile sites and upgrading and 'swapping out' infrastructure, thereby reducing duplication of existing infrastructure.

Mr Wozniczka said Elders was well aware of the need for improved telecommunications service to country Australia and is excited to be part of the process to improve telecommunications access for rural and regional Australians.

"Our clients know how Elders led the move to improve rural banking service with the formation of Elders Rural Bank. Through OPEL we expect to do the same in telecommunications which we see as highly synergistic with our existing product offerings in real estate, banking and financial services," Mr Wozniczka said.

OPEL will now commence negotiations with Government to finalise the commercial agreement. The Government requires the network to be built by 30 June 2009.

Facts

- OPEL will be jointly owned 50:50 by Elders and Optus. It is expected to be self-funding after initial financing of up to \$200 million and will benefit from contributions in kind, leveraging Optus' existing infrastructure and Elders distribution presence.
- OPEL's broadband wireless and ADSL2+ network has been designed to target a principal market of 3.7 million rural and regional premises. An additional 5.3 million premises could be served on the fringes of OPEL's broadband wireless network where there is already significant competitive broadband infrastructure.
- OPEL Network will cover 638,000 square kilometres and extends across all States and Territories.
- OPEL will deploy 1361 broadband wireless sites via WiMax, each with a reach of 20 kilometres and 312 latest generation ADSL2+ DSLAMS.
- Upgrade 1023 transmissions spurs and 461 new microwave transmission spurs.
- Where there is infrastructure duplication it will be reduced by: co-locating broadband wireless equipment; using existing 2G/3G mobile sites; and upgrading or 'swapping out' existing microwave or fibre distribution infrastructure rather than deploy new infrastructure.
- OPEL will initially deliver wireless broadband speeds up to 6 Mbps rising to 12 Mbps by 2009 and up to 20-Mbps on ADSL2+. Actual speeds will vary due to various factors such as distance from the base station, selected service, customer equipment and general internet traffic.
- OPEL will use a state-of-the-art broadband wireless technology based on WiMax standards. WiMax standards are well suited for the delivery of high-speed broadband across large geographic areas making it an ideal choice for low density populations like Australia.
- WiMax has been widely deployed across locations in Europe, rural USA and Canada to deliver both residential and business broadband services.
- Services will be retailed through 400 Elders and 100 Optus stores in rural areas.
- Residential broadband and telephony services will be supplemented by a range of business-grade offerings for both small and large organisations operating in rural and regional areas as well as providing wholesale backhaul transmission for local and regionally based service providers.
- Broadband wireless will utilise public and apparatus licence spectrum. The term WiMAX is used in this fact sheet as a generic term to describe a family of technologies that includes Broadband Wireless Access (BWA).
- OPEL will deploy a total of 1361 Broadband Wireless sites comprising: 438 in New South Wales; 339 in Queensland; 117 in South Australia; 45 in Tasmania; 296 in Victoria; 113 in Western Australia; 10 in the Northern Territory; and 3 in the Australian Capital Territory.

Media Release

- OPEL will deploy a total of 312 ADSL2+ DSLAMS and Optus will deploy an additional 114 ADSL2+ DSLAMS. A total of 426 exchanges will be activated with ADSL2+ comprising: 126 in New South Wales; 109 in Queensland; 44 in South Australia; 15 in Tasmania; 82 in Victoria; 49 in Western Australia and 1 in the Australian Capital Territory.
- Optus and Elders will adopt equity accounting in respect of their 50 per cent investments in OPEL.

About Elders

Elders is a wholly owned subsidiary of Futuris Corporation and Australia's leading rural and regional service provider. It has been serving the needs of rural and regional Australia for almost 170 years. From a network of 400 locations, including 280 rural branches, Elders delivers a multi-product service offering including sale and supply of farm inputs, agency services in wool, livestock and real estate, supply chain management, sale and marketing of meat, livestock and grain and financial services including banking (Elders Rural Bank), insurance (Elders Insurance), wealth management and telecommunications.

About Optus

Optus is an Australian leader in integrated communications - serving more than six million customers each day. The company provides a broad range of communications services including mobile, national and long distance services, local telephony, international telephony, business network services, internet and satellite services and subscription television.
